

Gurevich Yuri Genrihovich

Professor Titular I-F of the Physics Department, Center for Research and Advanced Studies of Mexico, Academician and Vice-President of the International Thermoelectric Academy, Regular Member of the Mexican Academy of Sciences, Member of the International Editorial Board of the Scientific Journal "Physic and Chemistry of the Solid State" Regular Member of the Organizing Committee and Program Committee of the International Conference "Physics and Technology of the Thin Films"

LX

Dear Yuri Genrihovich!

*Sincerely greet for You, the famous scientist in fields of nonlinear theory of the propagation of the electromagnetic waves in semiconductors and plasmas. Theory of transport phenomena in bounded semiconductors in strong temperature and electric fields. New mechanisms of generation of thermo- and photovoltage in semiconductors. The electron-phonon drag and transport phenomena in semiconductors. Electric instability in semiconductors. Creation of the thermoelectric and ecology pure photoelectric convertors, thermorefrigerators. Electron and phonon thermal waves in semiconductors, and true friend, sincere man, with the greatest anniversary — **60-year**.*

Sincerely wish for You the happiness, animation, wonderful health and subsequent successes in the scientific and pedagogical activity.
